DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Claims 1-11, and 14-15, 18-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Oppitz (US 4616125).

Oppitz discloses an apparatus with a self heating feature comprising conductive composite, wherein the at least one conductive component is adapted to couple with a source of electricity, and wherein the at least one conductive component heats up on passage of electricity, wherein the conductive component further comprises an insulating layer at least partially covering the conductive composite. It is noted that claims 3-11 recite particular uses of the heating element or methods of making the device without further limiting the structure and therefore do not distinguish over the prior art of record.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oppitz in view of Todt et al. (US 6599446).

Application/Control Number: 10/743,198

Art Unit: 3742

Oppitz discloses the claimed invention except that it discloses the use of carbon black instead of carbon fibers. Todt shows that carbon black and carbon fibers is an equivalent structure known in the art. Therefore, because these two additives were art-recognized equivalents at the time the invention was made, one of ordinary skill in the art would have found it obvious to substitute carbon fibers for carbon black.

Response to Arguments

Applicant's arguments filed 08/29/05 have been fully considered but they are not persuasive. Applicant argues that the reference does not disclose the nanosized conductive filler, however, applicant discloses in paragraphs 62-85 what may be considered a nanosized conductive filler. Carbon black is disclosed by the applicant as a nanosized conductive filler, such is the filler discussed by Oppitz.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Application/Control Number: 10/743,198

Art Unit: 3742

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thor S. Campbell whose telephone number is 571-272-4776.

The examiner can normally be reached on Mon-Fri 5:30AM-2:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on 571-272-4777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
